

Eco tubes

We are happy to present two types of Eco Tubes in our offer:

- **monomaterial HDPE** made from high-quality HDPE material and closed by an HDPE flip-top. Together they form a mono-material packaging with up to 45% less plastic in the tube body! Tubes are suitable for PE recycling streams. HDPE is a material known for excellent elastic properties, suitable for many products like cosmetic and pharmaceutical creams and balms.
- **PCR tube** (Post-Consumer Recycled) made from components which contain consumer recycled plastic. The use of PCR recyclate reduces the amount of new plastics in our environment. No new resource extraction is needed! PCR tubes are easy recyclable.

Due to expectations of the market tubes are available with regular closures as well as their slim versions*.

Meet your sustainability goals with Formika!

*available from Q1 2025 for tubes dia 50 mm

We don't want to just produce packaging, we want to make everyday life easier
