

## Pharmaceutical foil (blister foil)

Blister foil packaging is a **15 µm to 25 µm aluminium, hard or soft tempered**, used in the pharmaceutical industry for closing dry forms of drugs (capsules and pills).

The product is available as plain or printed foil. We have all the necessary certificates which are crucial for the pharmaceutical market.

Pharmaceutical foil and its printing process meet even the **strictest requirements** concerning packaging designed for contact with drugs and diet supplements.
